

PODS Flexible Storage Solutions

PODS' solutions can be adapted by any healthcare business for their storage and logistics needs. Our portable storage containers can be used for:

- Storage for medical, supplies, equipment, and inventory
- Expanding patient care space
- Hazardous materials storage
- Managing multiple locations
- Remodeling and renovations
- Employee or office relocation
- HIPAA-compliant patient record storage

Renovations and Remodels

Give contractors more room to work and cut down on project times. Streamline operations with centralized distribution of furniture, fixtures, and equipment to remodel locations.

Expand Revenue-Generating Patient Care Space

Inadequate storage space is a common challenge in the healthcare industry, forcing many businesses to use patient care space to store inventory, supplies, and less frequently used medical equipment.

Manage Multiple Locations

Easily transfer supplies, inventory, and equipment between locations without the need to coordinate with separate fleets or storage rental facilities.

Contracted Supplier

16' All-Steel Container*

PODS All-Steel Commercial Container offers storage capacity of up to 10,000 lbs., high-security doors and three locking options.

16' PODS Business Container

Businesses with large storage or moving requirements will find the perfect solution in this business storage container that easily accommodates up to 1,200 sq. ft.

12' PODS Business Container

Providing up to 1,000 sq. ft. of moving and storage space, this industrial container is ideal for businesses during remodels and protecting seasonal equipment.

7' PODS Business Container

This is PODS' popular moving and storage business container for businesses needing 500 sq. ft. or less of space to store or move valuable inventory.

GREATER FLEXIBILITY = GREATER SUCCESS

On-Site Storage

Have PODS containers conveniently delivered to your location and picked up when you're ready.

Off-Site Storage

Keep your PODS containers in one of our local, secure Storage Centers until you need them, and access your items at your convenience while they're in storage.

Local & Long-Distance Moving

With locations all over North America, PODS is able to transport containers virtually anywhere you need them.

SECURITY & PROTECTION

Protection from the Elements

PODS standard containers are designed with a sturdy steel frame and are weather-resistant, built to withstand winds of up to 110 mph. They're also made to be "breathable," which helps prevent moisture issues like condensation and mold.
