

2020 Education Series: Navigating Population Health and the Value-Based Landscape

We are pleased to announce and offer six
lunch-and-learn webinars for your organization!

Through funding from the Nebraska Office of Rural Health, Prairie Health Ventures, the NPG Health Collaborative and Stroudwater have partnered to offer monthly education webinars focused on various value-based and population health topics. These are offered at no charge, and open to anyone with an interest. There are no CEU credits offered with this series. Please see second page for the complete list of webinars and dates.

Population Health – What Is It and Where to Begin?

January 29, 12pm-1pm (CT)

<https://attendee.gotowebinar.com/register/9127521415422810123>

The first of our six “Lunch and Learns” will set the stage. What is population health? Who is your population? What does it mean to your organization and community? We will present an overview of Stroudwater’s Transition Framework which is designed to assist organizations in transitioning from a payment system dominated by the FFS payment model to one dominated by population-based payment models. Steps your organization can take to manage a defined population’s health will be highlighted.

Payer/Provider Contract Negotiations

February 26, 12pm-1pm (CT)

<https://attendee.gotowebinar.com/register/7677916489269986571>

This webinar will provide a solid payer/provider contracting process and framework that follows seven distinct steps. The webinar will walk through each of these steps and discuss why each is important. Many organizations struggle with payer contracting, often because steps are skipped or deemed unimportant. Following these seven steps will, over time, improve process efficiency, payer relationships, and outcomes.

Value-based Reimbursement Models

March 25, 12pm-1pm (CT)

<https://attendee.gotowebinar.com/register/6136115314105148939>

This hour will explore the various types of risk-based models and highlight the key components of those models and the nuances of negotiating and implementing risk-based contracts, from CMS models to contractual, value-based arrangements with commercial payers.

Social Determinants of Health (Stroudwater and our colleagues at Spring Street Exchange)

April 29, 12pm-1pm (CT)

<https://attendee.gotowebinar.com/register/1737618003233433867>

The healthcare news is filled with information regarding the importance and impact of social determinants of health (SDOH) on a population’s overall health and wellbeing. This webinar will provide some impact data and examples of successfully implemented solutions. We will discuss how you can utilize your community needs assessment and other data sources to identify and prioritize your community’s top issues. Our colleagues from Spring Street Exchange will provide information on payer initiatives and suggestions for how to best collaborate with payers and other community organizations to identify and address your community’s SDOH needs.

Building a Care Management Model for Population Health/Value-Based Care Models

May 13, 12pm-1pm (CT)

<https://attendee.gotowebinar.com/register/3399892667454163979>

This webinar focuses on a discussion of key organizational strategic and tactical decisions necessary to develop a healthcare organization’s Care Management Model; defines core care management roles, responsibilities, and functions; and reviews basic elements of the care management process, including use of population data to implement a successful Care Management program for organizations implementing population health strategies and starting to participate in value-based reimbursement arrangements.

Post-Acute Care Strategies

June 24, 12pm-1pm (CT)

<https://attendee.gotowebinar.com/register/3543348148553362955>

This webinar will provide a high-level overview of Post-Acute Care (PAC) as an important component of the care continuum and discuss the impact of PAC on quality and total cost of care. We will also briefly explore several PAC strategic options that hospitals and healthcare systems are increasingly adopting, as the delivery system moves from fee-for-service to value-based reimbursement arrangements.
