## Partnering With You to Maximize the Value of Healthcare in Your Community

This program has been designed exclusively for these communities, by using innovative strategies that only smaller communities can unify to achieve. The program has been designed to bring together the administrative innovation of a leading health plan administrator in Auxiant, with a Pharmacy Benefits Management firm in ClearScript that truly leads pharmacy cost containment strategies. Adding strong data analytics and population health analysis tools caps off this powerful program. The comma health program is fully endorsed by the innovative team at Prairie Health Ventures and delivered by the industry leading insurance professionals at UNICO.
