Supply Update - BD ChloroPrep™ Clear 1 mL Applicator

Dear BD Valued Customer,

We would like to provide you with assurance that BD can continue to address your BD ChloroPrep™ 1 mL Applicator needs. We remain committed to partnering with our channel partners and customers to address existing supply needs.

This letter is to inform you that BD is experiencing backorders on BD ChloroPrep™ 1 mL Applicators. BD continues to closely monitor inventory and customer ordering patterns and is partnering with manufacturing to maximize output and support supply continuity. These supply constraints may result in longer than anticipated order fulfillment for select items noted in the chart below.

While we continue to meet overall demand for many of our products, BD may experience tight supply of BD ChloroPrep™ 1 mL Applicators (930480). Until our supplier resumes normal operations, inventory controls are in place for these products.

BD is reminding customers and channel partners of the important role they play in maintaining availability of BD ChloroPrep™ 1 mL Applicators (930480) for the greater public health need, including:

- Do not order quantities in excess
- Do not stockpile or increase levels for par
- Do not "pull forward" orders that would typically be placed in the future

We anticipate shipments of BD ChloroPrep™ 1 mL Applicators (930480) to resume by May 2022. BD will continue to supply the 930480NSB, ChloroPrep 1mL Non-Sterile Bulk applicators, to our kitting partners at historical levels. Until our supplier resumes normal operations for the 930480, inventory controls are in place for the product.

Supply constrained product information
