BREAKTHROUGHS 26

UNLOCKED

Next-Level Performance. Powered by Intelligence.

Breakthroughs exists for a simple reason: Breakthroughs is where the healthcare community comes together. Every year, leaders from across our industry gather to connect, collaborate and explore the future of patient care. It takes all of us, working together and learning from one another, to accelerate progress.

This year's conference theme — Breakthroughs: Unlocked — highlights the new capabilities transforming healthcare today. From predictive workforce optimization to AI-enabled clinical decision support and supply chain resilience, intelligence is being integrated deeper into every clinical decision to shape the future of care. Breakthroughs 26 is where data becomes direction and intelligence moves into workflows. Together, we are unlocking the next level of patient care.

What to Expect

This year's discussions will focus on the issues defining the next chapter of healthcare, including:

- Clinical Excellence strategies that improve outcomes, safety and efficiency.
- Supply Chain Innovation to build resilient, efficient supply chains and operational models.
- Workforce Transformation that reinvents models and improves access.

Continuum of Care Programming Highlights

For providers beyond the four walls of the hospital, Breakthroughs 26 features our strongest Continuum of Care (CoC) programming yet — including a dedicated half-day of sessions and 3 thought leadership tracks. The content is highly targeted and practical, with clear, real-world takeaways, along with opportunities to connect with CoC leaders and peers shaping what's next.

Breakthroughs 26 is where connections turn into action. Engage with industry peers, exchange proven best practices, and learn from the success stories shaping healthcare today. Experience the latest innovations from our contracted suppliers on the trade show floor, and connect with thought leaders driving what's next. Breakthroughs is where insight meets impact.
